

MEDIA RELEASE – CONSTRUCTION UPDATE

For Immediate Release

November 19, 2009

Weather permitting, the top lift of asphalt for Christie Street is planned for Friday, November 20, 2009. Paving operations will require the complete closure of Christie Street and the adjoining side streets. Commuters are asked to plan accordingly and avoid the area altogether. The bad weather alternative for paving is Saturday, November 21, 2009.

The City also wishes to advise residents that Howard Street at Pembroke Street East (near McDonalds) is closed for emergency repairs to water and sewer systems in the area. The road is scheduled to be opened by the end of the day on Friday, November 20, 2009. Short term detours are in place.

Construction continues to progress on Elgin Street and the road is open for local traffic only. The final lift of asphalt on Bell Street is planned for early in the week of November 23.
